# **UNIFORM FEDERAL POLICY FOR QUALITY ASSURANCE PROJECT PLANS WORKSHEET WORKBOOK**

## **INTRODUCTION**

This *Uniform Federal Policy for Quality Assurance Project Plans Worksheet Workbook (Workbook)* is a companion document to the *Uniform Federal Policy for Quality Assurance Project Plans (UFP-QAPP Manual)*. It provides examples of worksheets to assist with the preparation of QAPPs in accordance with *Specifications and Guidelines for Quality Systems for Environmental Data Collection and Environmental Technology Programs*, ANSI/ASQC E4 (Final, January 1995). This Workbook may be used by Lead Organizations and their contractors to assist with the preparation of QAPPs for environmental data gathering activities.

Each worksheet addresses specific requirements of the Manual. Like the Manual, the Workbook is intended to be comprehensive and is not intended to be program-specific. Since the content and level of detail in a specific QAPP will vary by program, the work being performed, and the intended use of the data, specific worksheets may not be applicable to all projects.

The ultimate success of an environmental program or project depends on the quality of the environmental data collected and used in decision-making, and this may depend significantly on the adequacy of the QAPP and its effective implementation. It is recommended that the individual worksheets included in this Workbook be taken to the project scoping and planning meetings. The use of the worksheets will aid in identifying the critical project information that will ensure that the right type, quality, and quantity of data are collected to meet all of the project's quality objectives. Though the format of each worksheet is not mandatory, the information outlined in the worksheet "headers" must be provided if applicable to the project.

Certain sections, by their nature, will require more written discussion than others. In particular, Section 3.1.1 should provide an in-depth explanation of the sampling design rationale and Sections 5.1 and 5.2 should describe the procedures and criteria that will be used to verify, validate, and assess data usability.
